

Floorplan one

Floorplan one is the base configuration, available in a 52-foot or 60-foot width, approximately 50 feet deep and 18 feet high. Accessible from the airport service road with rear parking and drive-in access, the hangar opens directly onto the general aviation ramp near the southeast end of Runway 32. Each hangar is part of a larger building with a central compressed air system, internet, electronic access control, a small outdoor picnic area, and common storage.
